

# EDL 752 : Diversity and System Leadership

This course explores the opportunities and challenges that are present in schools as a result of multicultural, multiethnic, and diverse socioeconomic backgrounds of students, parents and staff. The focus is on the role of system leadership with regard to leaders' knowledge and leadership behaviors, policies, and practices impacting effective school and student performance among diverse populations. The course considers how the role of system leadership builds effective learning cultures in schools that are diverse and multicultural.
