

EDU 505 : Topics in Developmental & Educational Psychology

This course provides a survey of the most common developmental and educational theories and most popular applications for preschool and school age children (early childhood, childhood, and adolescence). This class fulfills the requirements for both Developmental Psychology and Educational Psychology for graduate students in the Sage School of Education M.S. and M.A.T. programs.

In this online course, students are expected to participate in the course several times weekly. Students will participate through group discussion (forums), online quizzes and tests, review and creation of PowerPoint materials, as well as submission of all course assignments online. Minimum requirements for participation in the course include a computer with high speed internet connection, a 2003 or more recent operating system, Microsoft Office Suite (including Word, Excel, and PowerPoint) and facility in the use of internet sources.
