

## EDU 661 : Internship in Art Education

The internship in Art Education is intended to be a unique experience that allows students flexibility with placement in which to gain experience and further develop as Art Educators. Similar to the student teaching experience, the internship is geared toward "learning by doing" but allows for different learning contexts when working with preK-12 students. Students must consult with their advisor regarding suitable options. Required seminar with the internship experience.

**Credits** 3-6
