

OTH 670 : Research Seminar II

The Research Seminar is designed to be the culminating experience of the research series in the occupational therapy program. This course will continue to provide students with a working knowledge of research methodology focusing on data analysis, writing, and reporting skills. Data collected in the previous semester will be analyzed, interpreted and reported back to research participants. The class meetings will involve data entry using computer software programs, peer debriefings, and other analytic discussions related to formulating the research findings. Each student will be required to write a final manuscript following the format outlined by a peer reviewed journal. As a final requirement, students are required to present their research experiences at the Graduate School Research Symposium.
