EDL 715 : Educational Leadership: An Endeavor of Human Interaction

This course examines organization, roles, and relationships within the various work settings of the school district leader. The course distinguishes between leadership, power, and fear as motivators for human action. The process and purpose of building and leading inclusive communities with collegiality and collaboration are explored in theory and practice. Candidates are engaged in activities and processes to develop knowledge and skill in areas of communication, negotiation, facilitation, conflict management, and feedback. These define the lens through which candidates observe and analyze the board - superintendent relationship within a school district.

Prerequisites

matriculation

EDL 720 : Leadership of Learning Communities

This course focuses on current change theory and on the historical and contemporary research in leadership theory and practice. Current applied research on the value and characteristics of learning communities are explored and related to leadership and the notion of service. Concerns of leadership are examined through theory and case studies ensuring candidates construct the personal and professional platform that will guide them as ethical decision makers. Security, risk, courage, and the meaning of work as motivators of action are investigated. Candidates will acquire knowledge of the leadership skills, values, and behaviors important to the development of communities of learners capable of significant service.

Prerequisites

EDL-715

EDL 725 : Accountability and Leadership for School Districts

Economic, political, social, and technological forces are converging on education with higher standards and increased system accountability. This course relies on the interrelated knowledge base about leading, learning, and change. The principles and policy that determine funding for public schools, the revenue sources that support a school district, budgeting, financial management and reporting are examined in this course. The public presentation relating the educational to the annual financial plan is also reviewed. Accountability data including student assessment results are investigated to identify strengths and problems and to guide the investigation into root cause and inform proposed solutions.

Prerequisites

EDL-720

EDL 730 : Law, Policy and Values

The legal and regulatory parameters and the formation, implementation and evaluation of education policy are the emphasis in the course. This course also examines the multiple facets of law, regulation and policy impacting system leaders. It is incumbent on the educational leader to be able to examine and lead an

organization and guide a governing board in the discussion of topics of critical interest to the educational community. This specifically includes the processes necessary to develop a policy position and course of action, to implement that course of action, and to evaluate the outcome of that course of action. New York State is the unit of focus with comparisons drawn to other states in a variety of areas.

EDL 735 : School District Leader Internship I

The internship for this program is a field experience that occurs throughout the candidate's first four semesters of study. The course is designed for each candidate specifically to ensure the Individual Leadership Plan fully addresses the Nine Essential Skills developed by the New York State Education Department. The candidate will be participating in seminars with the Sage faculty coordinator of interns, will be working with a site supervisor at each internship site and will also be assisted by an assigned executive coach during these semesters.

EDL 736 : School District Leader Internship II

The internship for this program is a field experience that occurs throughout the candidate's first four semesters of study. The course is designed for each candidate specifically to ensure the Individual Leadership Plan fully addresses the Nine Essential Skills developed by the New York State Education Department. The candidate will be participating in seminars with the Sage faculty coordinator of interns, will be working with a site supervisor at each internship site and will also be assisted by an assigned executive coach during these semesters.

Prerequisite Courses

EDL 735

EDL 737 : School District Leadership Internship III

The internship for this program is a field experience that occurs throughout the candidate's first four semesters of study. The course is designed for each candidate specifically to ensure the Individual Leadership Plan fully addresses the Nine Essential Skills developed by the New York State Education Department. The candidate will be participating in seminars with the Sage faculty coordinator of interns, will be working with a site supervisor at each internship site and will also be assisted by an assigned executive coach during these semesters.

Prerequisite Courses

EDL 735

EDL 736

EDL 741 : Foundations of Inquiry I

Systemic research is essential to improve the effectiveness of school systems and inform leadership decisions. This course is the first course introduced in the research sequence of the program. Exploration of problems and issues confronting school districts is pursued with the purpose of identifying a significant problem of practice for the research team and the individual doctoral research projects within the problem. Problems will present the complexities, the competing interests, and the systemic view characteristic of district leadership. The environment of the school district ? political, economic, legal, educational, social, and cultural ? will provide the context for the doctoral research problems. Under guidance of faculty and executive coaches, each candidate will identify the specific research problem to be investigated. Leaders of partnership districts will provide input to the problem and the needs assessment. The contract for an effective research team will be

finalized with the roles of individual candidates clearly defined. The final component of the course focuses on evaluation and presentation of research results. The impact of the doctoral research experience on the candidates' professional growth is collectively considered within the cohort.

EDL 742 : Foundations of Inquiry II

Systemic research is essential to improve the effectiveness of school systems and inform leadership decisions. This course is the first course introduced in the research sequence of the program. Exploration of problems and issues confronting school districts is pursued with the purpose of identifying a significant problem of practice for the research team and the individual doctoral research projects within the problem. Problems will present the complexities, the competing interests, and the systemic view characteristic of district leadership. The environment of the school district ? political, economic, legal, educational, social, and cultural ? will provide the context for the doctoral research problems. Under guidance of faculty and executive coaches, each candidate will identify the specific research problem to be investigated. Leaders of partnership districts will provide input to the problem and the needs assessment. The contract for an effective research team will be finalized with the roles of individual candidates clearly defined. The final component of the course focuses on evaluation and presentation of research results. The impact of the doctoral research experience on the candidates' professional growth is collectively considered within the cohort.

EDL 743 : Foundations of Inquiry III

Systemic research is essential to improve the effectiveness of school systems and inform leadership decisions. This course is the first course introduced in the research sequence of the program. Exploration of problems and issues confronting school districts is pursued with the purpose of identifying a significant problem of practice for the research team and the individual doctoral research projects within the problem. Problems will present the complexities, the competing interests, and the systemic view characteristic of district leadership. The environment of the school district ? political, economic, legal, educational, social, and cultural ? will provide the context for the doctoral research problems. Under guidance of faculty and executive coaches, each candidate will identify the specific research problem to be investigated. Leaders of partnership districts will provide input to the problem and the needs assessment. The contract for an effective research team will be finalized with the roles of individual candidates clearly defined. The final component of the course focuses on evaluation and presentation of research results. The impact of the doctoral research experience on the candidates' professional growth is collectively considered within the cohort.

EDL 744 : Foundations of Inquiry IV

Systemic research is essential to improve the effectiveness of school systems and inform leadership decisions. In this course of the research sequence, the individual researchers and their research team will present study results in scholarly written journal/conference proposal. Additionally, presentation of individual research to the doctoral committees will follow. For EDL 748, which this course precedes, each individual and team will also present their final research for a colloquia of invited guests including regional and statewide school leaders. The complexities, the competing interests, and the systemic view characteristic of district leadership within the research problems will be fully examined. This course will conclude with reflective engagement by all members of the cohort to self assess their team effectiveness. Furthermore POP teams will submit a draft of the Conference Proposal or Journal Article (CP/JA) document including: Abstract, Purpose Statement, Literature Review/Framework and Methods.

EDL 745 : Introduction to Research Methods

This course is to help doctoral candidates develop a basic research design by introducing them with relevant research and statistics vocabulary. This course includes basic research terminology and an overview of qualitative and quantitative research design issues. Some examples of the terminology presented in this course are population, sample, research question, null and directional hypotheses, primary and secondary sources, meta-analysis, institutional review board and human subjects protection, descriptive statistics, inferential statistics, significance testing, effect size, unit of statistical analysis, types of sampling (random, systematic, cluster, convenience, purposeful), reliability, types of validity, bias, parametric and non-parametric statistics, and correlation. The overview of research design issues will include descriptive, causal-comparative, correlational, case study, survey, observational, ethnographic and historical research.

EDL 746 : Research Methods I

This course explores research strategies associated with qualitative and quantitative designs. The focus is on the practical application of these research strategies to problems of practice related to educational leadership. The uses of observation, surveys, and interview are explored in depth. The emphasis is on the collection, organization and analysis of data. Candidates will compare the relative strengths and weaknesses of each research tradition in order to be best able to select a strategy for his/her doctoral project. This is a hybrid course that utilizes face-to-face seminars, online discussion as well as the use of Moodle activities which will provide students the opportunity to view assignments, PowerPoints, and related documents for understanding qualitative and quantitative research. Students will be required to interact with the instructors using Skype to receive constructive comments on assignments. Instructor will also interact with students via email and online journal.

Prerequisites

EDL-745

EDL 747 : Research Methods II

This course focuses on the development of the individual doctoral research projects of each doctoral candidate. Candidates develop research questions or hypotheses, design the methods section of their doctoral study, and complete the Sage Institutional Review Board's application.

EDL 748 : Research Colloquium

The Doctoral Research Colloquium is the culminating course in which each doctoral research team presents to the gathering of Sage faculty, executive coaches, colleagues, and educational leaders from school districts and educational agencies. Presentations include joint literature reviews related to team problems of practice, addressing each individual dissertation and concluding with a set of joint recommendations for the field and reflect the School of Education's commitment to best practice in instructional technology. The course includes an opportunity for reflective conversation among cohort colleagues regarding the program and their development as scholar practitioners during the twenty seven months of study.

EDL 750 : The System Leader

The school district leader works on, rather than in, the system and must be able to see both "the forest and the trees". This course examines the complexity of the modern school system as well as the systemic thinking and action required to effectively lead it. Through review and synthesis of earlier program content and experiences, candidates will develop the ability to comprehend the interrelationship of subsystems, identify often elusive levers of change and cultivate effective learning communities. This course will assist candidates in framing their capstone projects by deepening their knowledge of systems and their skill in analyzing them.

EDL 752 : Diversity and System Leadership

This course explores the opportunities and challenges that are present in schools as a result of multicultural, multiethnic, and diverse socioeconomic backgrounds of students, parents and staff. The focus is on the role of system leadership with regard to leaders' knowledge and leadership behaviors, policies, and practices impacting effective school and student performance among diverse populations. The course considers how the role of system leadership builds effective learning cultures in schools that are diverse and multicultural.

EDL 755 : Doctoral Research I: Problems of Practice

This course leads candidates to the finalization of project design and through the collection, interpretation, and analysis of data to inform decision making at the participating research site. Candidates will exhibit the ability to critically and comprehensively examine an important problem, contribute to organizational change, and improve district performance. In consultation with a doctoral advisor candidates will submit the results of their research in prescribed written format and will report the research results as a member of a research team to an assemblage of practitioners, faculty, and peers. The course will create the seminar space for candidates to explore who they are as they conclude the doctoral program and deeply consider the contribution they will make by leading a school system.

Prerequisites

EDL 715, EDL 720, EDL 725, EDL 730, EDL 735

EDL 756 : Doctoral Research II: Problems of Practice

This course leads candidates to the finalization of individual candidate doctoral research projects with a particular emphasis on summary of findings, conclusions, and recommendations. Candidates will exhibit the ability to critically and comprehensively examine an important problem, contribute to organizational change, and improve district performance. In consultation with doctoral research committee chair and members, candidates will submit the results of their individual doctoral research as per the format outlined in the Russell Sage College Educational Leadership Research Handbook.

EDL 770 : Doctoral Research Continuation

This course serves those who have need for extended time to complete individual or team research requirements of the EdD program. This is a repeatable course and is delivered to individual candidates on an as needed basis.

EDL 771 : Dissertation Writing I

This course focuses on one-to-one work between the candidate and their dissertation chair (course instructor). The candidate will work with their dissertation chair and other committee members to develop dissertation chapter(s). The focus is on the writing of the chapters and individual guidance from the dissertation chair. This is an independent study course that utilizes online discussion, written and verbal feedback from the dissertation chair and interactions by phone, email, face-to-face meetings and/or virtual meetings. At the completion of EDL 771, students will have completed purpose statement, research questions, and draft of Chapter One.

EDL 772 : Dissertation Writing II

At the completion of EDL 772, students will have completed an acceptable draft of Dissertation Chapters Two and Three, and submitted an IRB application.

EDL 773 : Dissertation Writing III

At the completion of EDL 773, students will have completed an acceptable draft of dissertation chapter four.

EDL 774 : Dissertation Writing IV

This course focuses on one-to-one work between the candidate and their dissertation chair (course instructor). The candidate will work with their dissertation chair and other committee members to develop dissertation chapters. The focus is on writing of the chapters and individual guidance from the dissertation chair. This is an independent study course that utilizes online discussion, written and verbal feedback from the dissertation chair and interactions by phone, email, face-to-face meetings and/or virtual meetings.
